

MARKA PROJECT: Estonia 01-08/10/2022

My experience in Estonia with the Marka project will always be one of my core memories. In that week we experienced a very different everyday life, at times more advantageous and other less. We were able to visit amazing natural reserves all across the island of Saaremaa, create new bonds and share our culture and learn from others. In that week we were able to increase our ability to communicate and socialize, trying new food and sharing (for our possibility) our culture.

After all, as expected, Estonia was worth the tiredness of the journey.

I think that, based on my experience, the Marka project is a great way to promote the culture and the exchange of knowledge between the students from the different countries. It's challenging and an occasion to visit new places and meet new people who have different uses as yourself but who also finds out to have a lot in common even living so far apart from each other. I found the week we had in Estonia very interesting and I think it was a great

My Erasmus experience with Marka project was great and challenging; that one week was truly heartfelt, and I will always remember this trip as one of my favourites. This project gave us the possibility to improve ourselves and our communication skills, and also to find out a lot of things about other countries, discovering that, despite the distance, friendships can be created nevertheless. I feel really lucky to have had this chance.

During my experience in Estonia, I got to know many interesting people with whom I was able to increase my English. I also believe that traveling to new places and facing new cultures is very useful for one's personal growth I did a lot of interesting activities that helped me to get to know the area better and train me to speak English. This is one of the most beautiful and interesting trips I've ever done and I will always remember it. I recommend everyone to have an experience like this.

The students involved in the mobility
